

SAAD ARAFET BEN MAHFOUDH

SOFTWARE ENGINEERING STUDENT

Masdour 5032, Monastir | arafetmahfoudh29@gmail.com | +216 52001676

Profile

A 5th-year Software Engineering student specializing in front-end development and passionate about electronics and robotics. I have a solid background in designing and developing modern, ergonomic, and high-performance web interfaces. With an analytical mindset and strong adaptability, I aim to apply my technical and analytical skills within an innovative and dynamic company as part of my final-year project (PFE).

Curious, motivated, and results-oriented, I am actively seeking opportunities to develop my skills in software engineering, web technologies, and embedded systems, while contributing to innovative and collaborative environments.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, PHP(Laravel), SQL, Python, C++, Dart, Kotlin, Swift	Electronics & Robotics : Arduino, Raspberry Pi, microcontrollers, sensors/actuators	Networks & Systems: Basic knowledge of computer networks
Front-end Development : HTML/ CSS, Vue.js, React.js, WordPress, Bootstrap, Tailwind CSS, Flutter, UI/UX Design	IAI & Data Science / Data Analysis: Machine Learning, Data Visualization & Processing (Python: pandas , NumPy, scikit-learn, matplotlib)	Development Tools : Git/GitHub, VS Code , Laragon, Figma , Android Studio, XCode, Arduino IDE, Proteus, Wokwi,
Databases: MySQL, MongoDB		

PROFESSIONAL EXPERIENCE

Front-End Intern – AC Time International Sousse, Tunisia July 2025 – August 2025 - Developed the front-end of the company website using Vue.js, HTML, and CSS, enhancing user experience and interface design. - Implemented responsive layouts, increasing accessibility across devices and improving site engagement.
Final-Year Project Intern – Farhat Hached Hospital, Biomedical Dept. Sousse Feb 2023 – Jun 2023 Designed and built a mini electric wheelchair with dual control (joystick & Bluetooth), powered by solar photovoltaic energy, demonstrating autonomous mobility for short indoor/outdoor distances; programmed and simulated the Arduino system in Proteus.

ACADEMIC PROJECTS

SmartResto – Intelligent Restaurant Management System (Vue.js, Laravel) - Web interface for managing orders and inventory. - AI module for predicting workload and optimizing stock levels. - Real-time statistical dashboard. - Process automation to improve efficiency.
E-commerce Website (Vue.js & Laravel) - Full-stack web application with front-end and back-end development. - Product management and user authentication system.
Freelance – Website for Ceramic Store (WordPress) - Website for a ceramic company. - Customized theme design, and smooth navigation experience.

EDUCATION

Engineering Degree in Software Engineering Epi Digital School (Private Higher School of Engineering) – Sousse *(2023-Present)*
Bachelor’s Degree in Electrical, Electronic, and Automatic – Specialization: Renewable Electrical Energy Higher School of Sciences and Technology of Hammam Sousse (ESSTHS)*(Graduated in 2023)*
Baccalaureate in Technical Science High School of Jemmel*(2019)*

LANGUAGES

- English: Technical proficiency
- French: Fluent
- Arabic: Native

CERTIFICATIONS

- Microsoft Azure Fundamentals (Claude Azure)
- CCNA1 & CCNA2 (Cisco Networking)

PERSONAL QUALITIES

- Teamwork
- Project management
- Problem-solving
